US Pandemic Czar Dr. Anthony Fauci proclaimed that

*(a) Dr. Fauci  $\equiv$  Mr. Science;*

*(b) Following Fauci  $\equiv$  Following science;*

*(c) Criticizing Fauci  $\equiv$  Attacking science;*

*(d) Courts have no dominion over Fauci health diktats.*

Oddly, Dr. Fauci is not a scientist by academic qualification.

Those who have toiled and moiled to earn that title  
would never make those kinds of claims.

# PREFACE:

## HOW IS DR. FAUCI MR. SCIENCE?

The world witnessed how Dr. Anthony Fauci, an occasional face on TV in the US public health arena, burst forth into the battlefield of the COVID-19 Pandemic as an Eisenhower-like figure. He was in effect the allied supreme pandemic commander for the America-following world.

Dr. Fauci is technically knowledgeable in his areas of science, and is an astute bureaucrat. But as events unfolded, I began to notice things that were not at all stances of scientific leadership. For example, Fauci was not acting like the consensus voice of the institution whence his authority flows, but glorying like a standalone one-man glamor show (*I made the decision...; I stand by what I said ...; I made a calculation ...*). While he copiously cited dubious studies to support his ever-changing positions, he meticulously avoided mentioning his own inhouse studies. To this day we don't know what service *NIAID scientists* performed. Camera-loving Fauci hogged the 'limelight'.

Fauci was spending an inordinate amount of time with the media, like a Madison Avenue-style spokesperson. The glamor hound was schmoozing most comfortably with Hollywood divas. I vainly looked for any reports of him or his staffers visiting a COVID ward or a vaccine dispensary to see if the treatment protocol on the ground was shipshape, and to get a feel for the human side of the scientific problem.

There rightly emerged dissidence from certain medical and biological experts. Having no knowledge of these

sciences, I just watched with interest, like a lay citizen. Then I saw Fauci's manifest disdain for this needful scientific debate, claiming to be the supreme arbiter of science. That is what got my goat. I looked closer.

Dr. Fauci has no academic credentials as a scientific researcher. He finished schooling as a medical practitioner (Think of your family physician.) One can still become a scientist by subsequent independent research, evinced by signature contributions. But all I could find is that his name was an appendage to lists of diverse author groups and inventor groups, seemingly under his official control (gift authorship?).

The questions remain: How is Dr. Fauci the ultimate arbiter of science? Why was he free to dismiss trained and experienced scientists in his field who pointed out his fateful missteps? Why was collateral damage not a factor he weighed? Why didn't we see in Fauci a single sign of compassion? What manner of man would seek to glamorize himself amidst pestilence-stricken multitudes?

Lastly, but very importantly, what about all the powerful people who propped up, supported, promoted and heroized Dr. Fauci, and made it possible for him to operate as an absolute medical dictator? Please to consider African proverb: *He that beats the drum for the mad man to dance is no better than the mad man himself.*

## ABOUT THIS EBOOK

The graphics in the following pages are taken from the blog site *The Dreamheron Chronicles* where these were posted in a timely manner as the pandemic unfolded. At the time, it was a very dangerous thing to speak out against Fauci. His reign of fear was palpable. It is only today that more and more information about Fauci is coming out, horrifying us as to how he could have become the US pandemic czar in the first place. Dr. Fu Manchu comes to mind. The real-life doctor who comes to mind would be problematic to mention.

A PUBLIC AWARENESS-RAISING SKIT FROM BIBHAS DE  
**A HEARING IN THE U.S. SENATE ON COVID-19**

**SENATE DEMOCRAT:** Dr. Fauci, you have been much vilified in this chamber. So let me try to show the world what a wronged man you are. You are the symbol of scientific truth and trustworthiness, correct?

**DR. ANTHONY FAUCI:** Yes, I have said so. Others have said I am a sex symbol and I hung the moon. I find these descriptions interesting.

**SENATOR:** Your training as a deep, deep medical truth-seeker must have started in the undergraduate years with lots of biology and chemistry and physiology and genetics and the like?

**FAUCI:** My undergraduate emphasis was in Classics.

**SENATOR:** I see ... you studied Greek mythology and stuff. You must have done scientific research in graduate school then?

**FAUCI:** I studied to become a medical practitioner.

**SENATOR:** But that's not research by any stretch of definition. Have you never written a dissertation, something every scientist has done?

**FAUCI:** Actually, no.

**SENATOR:** (coughs) ... So you must have picked up research credentials on the fly when you became a clinician. You are named on more than a thousand research publications. Are you the first author – the lead researcher that is – on many of these research papers?

**FAUCI:** Actually, no.

**SENATOR:** Well, OK. How about patents though? You are a celebrated inventor. Surely you are the first-named inventor on many patents?

**FAUCI:** Actually, no.

**SENATOR:** Dr. Fauci, you have no credentials as an independent scientific researcher. You've taken dangerous ego trips with gain-of-function research. You've been ruthlessly trashing credentialed and conscientious researchers who disagree with you. What gives you the license to impose yourself as the scientific autocrat over the health of the world citizenry?

**FAUCI:** Yamiche Alcindor.

Dr. Fauci on February 28, 2020:

# **COVID-19 no worse than bad influenza season**

".... the overall clinical consequences of Covid-19 may ultimately be more akin to those of a severe seasonal influenza (which has a case fatality rate of approximately 0.1%) or a pandemic influenza (similar to those in 1957 and 1968) rather than a disease similar to SARS or MERS, which have had case fatality rates of 9 to 10% and 36%, respectively."

- Anthony S. Fauci *et al*

<https://www.nejm.org/doi/full/10.1056/NEJMe2002387>

# *The Fauci Interpretation*

**28 FEBRUARY 2020: Covid-19 is like flu**

".... the overall clinical consequences of Covid-19 may ultimately be more akin to those of a severe seasonal influenza (which has a case fatality rate of approximately 0.1%) or a pandemic influenza (similar to those in 1957 and 1968) rather than a disease similar to SARS or MERS, ..."

*Dr Fauci, New England Journal of Medicine*

**15 MARCH 2020: Don't know what Covid-19 is**

"... it's brand new so we don't have any prior experience about what it's gonna do, what it's dynamic's gonna be."

*Dr Fauci, on CNN*

**27 MARCH 2020: Covid-19 is NOT like flu**

"The overall mortality of seasonal flu that you and I confront every year is about 0.1%. The overall mortality of coronavirus is about 1%. ... Which means it's at least ten times more serious than the typical influenza."

*Dr Fauci, NBC*

March was a time-critical month. Over this short period, Dr Fauci changed his assessment continuously and on the fly – an assessment that is of existential consequence to hundreds of millions of people. On the face of it, this is as it should be: A scientist changes his conclusion based on new scientific evidence. But that's not what happened here. Dr Fauci manifestly changed his approach based not on any new Covid-19 clinical or biological science but on scary rush on hospitals, and scary numbers – numbers of case deaths and numbers of people tested positive. The pressure on hospitals is not sufficient reason to shut down the economy. And the meaning of those numbers, as I read, is wide open to interpretation by different but equal experts – with loose conclusions ranging from favoring full lockdown to no lockdown. We are going with the *Fauci Interpretation* which

- (1) pushes a one-track *people-will-die-otherwise* logic without any risk/benefit analysis involving different interpretations;
- (2) prevents the populace from acquiring natural immunity to a new virus in nature's way – being freely exposed, getting sick (or not), and then emerging with lifelong immunity to the virus; and
- (3) relies – for an exit strategy - on Providence to “flatten the curve.”

If Gen. Eisenhower waited for Providence to provide perfect weather to launch the D-Day invasion, we might all be sprechen-ing in German today. Lord have mercy. Bibhas De 04/11/2020

# THE DANGER TO SOCIETY from ENTRENCHED EXPERTISE

Entrenched expertise can be a two-edged sword. It can help or harm. We are talking here about scientific expertise.

A stark example is the Challenger Disaster. Teams of entrenched experts caused it, and a non-expert finally figured out the problem. Men and women died needlessly.

Another example is how layers upon layers of expert design reviews produces a misshapen mirror for the Hubble telescope. Then they launched this jobbie! In the end, astronauts had to make the repair in space.

Yes, teams of experts can and do screw up collectively. When this involves great death, great vigilance is necessary - in real time, not after the fact.

Dr Anthony Fauci is an eightyish man who says he works twenty stressful hours each day, and finds daily White House strategy sessions "draining." He dismisses prevailing scientific approaches that are different from his. He has made a choice, and that's that. Why are Covid-19 patients in hospitals lying down flat on their backs when the clear *medical* directive says they must be sitting up (even when sleeping)? In the time of the Spanish Flu, this vertical position is said to have saved lives. Please, what is the new medical wisdom that says the horizontal position is now the better one? Are ventilators actually harming the patients as some *doctors* in the field say? Why so much critical decision-making emphasis on testing when the accuracy of the tests is totally up in the air? But Dr Fauci goes forth. The question is: Does he know where 'forth' is?

Bibhas De 04/18/2020

# DR. FAUCI IN FOCUS

According to various polls, a vast majority of Americans trust Dr. Anthony Fauci and are content to maintain the lockdown indefinitely, until the good doctors give the OK.

I do not have any issues with Dr. Fauci's experience and expertise, qualifications and credentials, and past service to the nation. I do not believe he is involved in any interest groups. Here are my crystal-clear points on this issue, based on facts in evidence:

(1). THE FUTURE: Dr. Fauci offers no alternatives to lifting the lockdown except to say some solution may come along in weeks or months or years, *or may not*. **He is telling folks on the Titanic to not risk getting on the lifeboats, because a rescue helicopter is coming – piloted by Godot.**

(2). THE PRESENT: From the beginning of this pandemic, Dr. Fauci has flipfopped on the deadliest issues. Remember that bogus "2.2 million people dead" prediction he ran with most irresponsibly, and scared President Trump into starting this whole thing? Remember his 'Covid-19 is just flu'? Maybe flipflop is the nature of his business. **But this proves that nothing he says is certain from day to day.**

(3). THE PAST: Dr. Fauci is very much responsible for Covid-19 hospital treatment regime. If patients have needlessly died because of being placed in the horizontal position (against established medical dictum) or because of wrong use the ventilators (as some hands-on doctors have said), Dr. Fauci must answer. **We need to get to the bottom of this. The accountability for a fait accompli matter must be addressed before reliability on a future matter.**

Trust?! Heed the proverb: "Trust in God, but tie the camel."

## **Prone positioning in severe acute respiratory distress syndrome.**

"A total of 237 patients were assigned to the prone group, and 229 patients were assigned to the supine group. The 28-day mortality was 16.0% in the prone group and 32.8% in the supine group ( $P < 0.001$ ). The hazard ratio for death with prone positioning was 0.39 (95% confidence interval [CI], 0.25 to 0.63). Unadjusted 90-day mortality was 23.6% in the prone group versus 41.0% in the supine group ( $P < 0.001$ ), with a hazard ratio of 0.44 (95% CI, 0.29 to 0.67). The incidence of complications did not differ significantly between the groups, except for the incidence of cardiac arrests, which was higher in the supine group."

## DR. FAUCI'S WATCH

*(I am not a medical expert. But the following does not require any medical expertise.)*

As of this day, some fifty thousand people have died.

### **PATIENTS WHO DIED WITHOUT VENTILATOR**

There is clear and established medical knowledge and practice that such patients have a greater chance of surviving if placed in the sitting position (even when sleeping.) See the first graphic below. I do not know if this was the case in U.S. hospitals.

### **PATIENTS WHO DIED WHILE ON VENTILATOR**

There is clear and established medical knowledge and practice that such patients have a greater chance of surviving if placed in the prone position. See the second graphic below. I do not know if this was the case in U.S. hospitals.

This matter goes to the very core of the quality and the thoroughness of the expert medical team in charge of combatting the pandemic. The ongoing media rumpus about vilifying President Trump and heroizing Dr. Fauci – whichever side of this you stand on – may be masking very serious issues.

## A magnificent civilization?

For a thinking person, it must be clear that the American civilization is rapidly collapsing. Its lead will be replaced by the Chinese, Russian or European civilization. What this thinking person should also consider is this: When we cut through all the word haze, we are in the end dealing with an eightyish, dogmatic scientist Dr. Anthony Fauci, belonging to a dominant epidemiology "school". He senses challenge to his dominance, and is lashing out.

We all remember how, when President Trump signaled the reopening of America in a phased and careful way, Dr. Fauci stood by him in solidarity. All the dangers about which he is warning us hourly today were known at that time. They were built into the "phased and careful" approach. Furthermore, these future dangers are of Dr. Fauci's own making – when he imposed the hard lockdown. These were completely foreseeable.

So why, instead of working alongside the leadership the way he agreed, is he out on his own on this frantic boogeyman gig? My explanation: The old scientist – having tasted unprecedented public adulation ever given to a single scientist - wants to *prevail*. He wants to jump over the heads of the actual hands-on leaders, and land at the forefront. Perhaps he has never heard the old adage: *A wise man never plays leapfrog with a unicorn.*

The “science” involved in Covid-19 Pandemic is Epidemiology. This is no more science than Economics is science. Both have elements of science, but then also other elements that are vastly subjective and endlessly fudgeable. So, no. We are not following science.

The key epidemiologists you see above have widely different views with wide followings. Fauci is for hard and indefinite shutting down of society and economy. He relies on Ferguson who is a known nutcase. The Swedes are for selective shutting down of society while keeping the economy fully open. Both “schools” expect some bumpy road ahead.

We are following not science, but different schools. USA has settled on the Fauci-Ferguson school.

Where Fauci was to show us his mettle in *actual science* – saving lives of Covid-19 patients in hospitals by applying existing medical knowledge – he may have allowed avoidable deaths in great numbers. Bibhas De 05/04/2020

# THE SCIENTIFIC CASE AGAINST **DR. ANTHONY FAUCI**

Many criticisms of Dr. Fauci – right or wrong – have come from conspiracy theorists, and on this basis, all criticisms of him are being lumped together and dismissed. Fauci singlehandedly impacted the lives and the livelihoods of 300 million Americans, and the very soul of the Great American Civilization. So, let me tell you what a few of the *objective* scientific criticisms are:

- Any scientist worth his salt has a thing called scientific gut. When he sees some new result, it is this gut that engages first, and either entices him or gets his dander up. When Dr. Fauci heard that 2.2 million Americans would die, he walked straight into the Oval Office and sank America into this abyss of horror. No vetting of any kind of a number – which might puzzle even John Q. Citizen – from a long-known crappy scientist using a long-known crappy computer code.
- As tens of thousands of Americans died on his watch, presumably of Covid-19 respiratory infection, he did not move to apply the solid, long-existing medical knowledge that those patients needed to be kept sitting up or placed in the prone position. It may that half those deaths could have been prevented. Fauci is accountable for *great death*.
- Fauci said he had decided on an approach, and was staying with that. Others have other approaches, and he would not take from them. A scientist would *never* take this attitude.

It has been said that with the Pandemic, we are in a war. Staying with that analogy, in my view, Fauci and his teammates should face an open Nuremberg-style tribunal.

***MORITURI TE SALUTANT***

## **THE LESS KNOWN EPIDEMIOLOGIST USING UNLIMITED SUPPLY OF HUMAN GUINEA PIGS TO TEST PET SCIENTIFIC THEORIES**

SS-Hauptsturmführer Josef Mengele, also known as "Angel of Death", had doctorates in medicine and anthropology, and some pet theories about a superior race. He was respected as a scientist. He got himself transferred to Auschwitz-Birkenau so he would have unlimited supply of human lives to experiment with. As the captives filed past him, with the flick of a finger he decided which ones should go to his lab and which ones to the gas

chamber. He liked to experiment with twins. If one of a twin died because of his horrible experiment, he killed the other one so he could do a comparative, side-by-side autopsy.

Less known is the fact that Mengele did extensive studies in epidemiology, to do with noma (a bacterial disease), typhus, scarlet fever, and other diseases. He experimented with quarantining patients in different blocks. In one clinical trial he sent 600 Jewish women to the gas chamber just to empty out a block. He then disinfected the empty building so new "patients" – bathed and de-loused - could move in.

Mengele never faced any accountability. When the Mossad was about to capture him, they were told to back off. Israel had lost her will to go after fugitive Nazis. He led a full life and died a natural death in Brazil.

I so wish we had learned never to consign again so many precious lives to one who runs with totally bogus science.

## CORONAVIRUS PANDEMIC

# ANALYZE THIS:

"I have never made myself out to be the end all and only voice in this. I'm a scientist, a physician and a public health official. I give advice according to the best scientific evidence." — Dr. Anthony Fauci to US Senate 5/12/2020

Dr. Fauci as "a scientist" is not following what scientists understand the scientific method to be. He is picking and choosing what "scientific evidence" suits him, and is blatantly impervious to copious amounts of contrary evidence from legitimate, pertinent and honest studies.

Dr. Fauci as "a physician" never engaged in developing a nationwide COVID-19-specific hospital protocol based on existing medical knowledge that might have prevented half the deaths so far (correct patient position, correct ventilator application, etc.) This hypocrite shows no concern for the currently ill, but raises the specter of *future* deaths for fearmongering.

Dr. Fauci as "a public health official" has declared that economic 'inconvenience' is not his concern, and others should look after the economy. OK. But then he has constantly thwarted the efforts of those others by acting like a crazed Cassandra on the Horn.

Dr. Fauci does not speak for science. The newly emerging affliction of children may be the final juncture for US to get real science onboard. Dr. Fauci is playing America like a finely-tuned Stradivarius. Somebody better wake up!

# CORONAVIRUS PANDEMIC

## DR. FAUCI'S BOSS

The person with the primary official responsibility and the duty to deal with Dr. Fauci's dangerous screwing around in the name of science is Dr. Francis Collins, and not President Trump. But Dr. Collins has indicated he is not going to do anything, in this interview with STAT on April 21, 2020:

Dr. Francis Collins, NIH   Dr. Anthony Fauci, NIAID

"Tony is a complete model of what you want to see in a public servant. He is dedicated, he's incredibly smart and knowledgeable. He is both a fantastic scientist and a very experienced physician who personally took care of Ebola patients when we had them in our hospital just four or five years ago.

And he is incapable of actually doing anything except speaking truth. He has a lot of truth to offer, and he speaks it in a careful, diplomatic way. He's also not somebody who will slip into demonizing anybody, or throwing mud back at people who are throwing mud at him, he's just gonna be what you want to have in the room when an important decision is being made, who can tell you: Here are the facts, here are the consequences if you do A or you do B." – *Dr. Francis Collins, Dr. Antony Fauci's boss*

What is going on here is very powerful and insidious cronyism among noble intellectuals. Dr. Collins has been a beneficiary of this himself. He would not be where he is today had it not been for the fact that, a long time ago, his cronies saved his job and his reputation in a serious science fraud matter he was involved in. The final verdict was that Dr. Collins had acted in an honorable manner by helping throw his young student under the bus. Dr. Collins was a coauthor of that fraudulent paper.

Is even great death in great numbers today not sufficient reason to finally deal with unchallenged privilege?

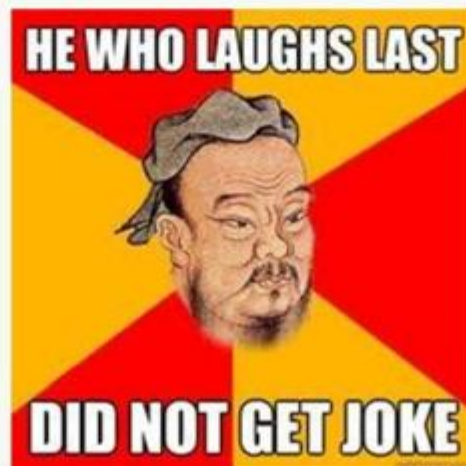

## CORONAVIRUS PANDEMIC

# WHO SHUT DOWN THE ECONOMY?

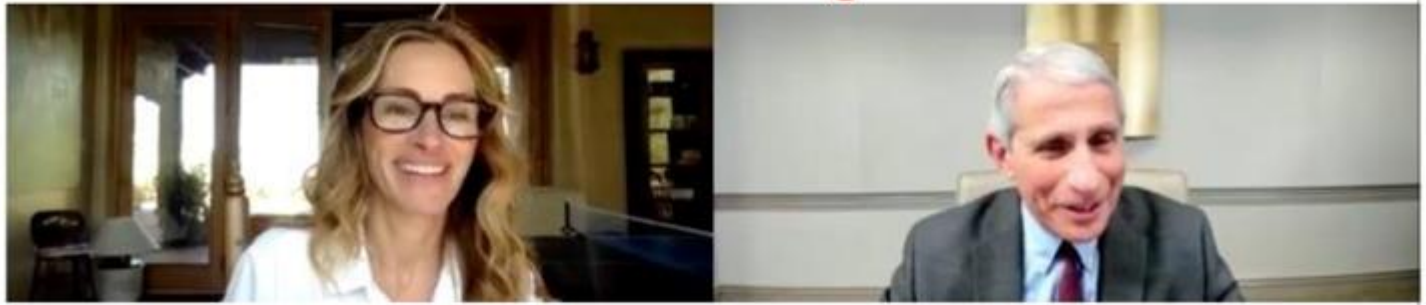

"A lot of people use me as a symbol for shutting down the economy. It's understandable but not really real."

- Dr. Anthony Fauci, interview, *Time Magazine*, 11 May 2020

## **DR. ANTHONY FAUCI TO HELP CREATE "A MORE JUST AND EQUAL WORLD."**

I have never heard anything more ludicrous. He has irreversibly messed up America, and now he wants to do the same to the World! It seems he's not so busy after all! There is a whole concerted ruse afoot to distract the public from calling Fauci to account. Don't let him weasel out of this one.

America has been paying Fauci her third highest salary: \$335,000 a year. She nurtured him so well just so he would save her in times like this. He sure gave something back!

He hangs out with celebrities. He cooks shpageta with Bono and saves the world with Julia Roberts.

He is tight with media. When Chris Cuomo falls ill, the compassionate soul calls every evening to check.

He fearlessly speaks truth to power. He confidently speaks on "all sides of the equation."

He is on a first-name basis with tycoons like Bill Gates.

He is a great scientist and clinician, and "the sexiest man alive." A kind of Galen and Satyr rolled in one. His name is on women's lingerie. He will be TIME's 'Person of the Year'.

Have you ever heard this scientist apologize for or even own up to his deadly misdecisions? Seen any photos of this clinician doing the rounds of COVID-19 hospital wards? Ever sensed even a tinge of human compassion in this public health official? He is accountable for destroying the most magnificent civilization arisen on Earth, and for great death and deprivation that are surely coming.

# **FRANCIS COLLINS RENEWS HIS CHARACTER CERTIFICATE ON ANTHONY FAUCI**

In an interview with *The Philadelphia Inquirer* dated 20 May 2020, Francis Collins, Director of NIH reissued his previous character certificate on Anthony Fauci, Head of NIAID:

**Anthony Fauci, the head of NIAID and a point person on COVID, sometimes has to correct inaccurate information from the White House. Do the periodic conflicts get in the way of the important public health message?**

He's an incredible public servant and a dedicated scientist and a wonderful human being. I've known Tony for 30 years. Tony is both a phenomenal leader, communicator, and scientist of the highest repute.

Tony and I talk virtually every night, some time between 8 p.m. and 10 p.m. You will not meet a more dedicated public servant than Tony Fauci.

**So you think he is managing the conflicts OK?**

I think he is unable to do anything other than telling the truth as he sees it, in terms of what the public health risks are.

He will not sugarcoat that, even if people don't want to hear the message.

**Collins is in total denial of all that transpired with the 79-year old Fauci's dangerously erratic conduct, including his wanting to exploit a children's health issue for his scaremongering, and now suddenly saying the lockdown (which he imposed and prolonged) can do irreparable damage. Why are Collins's certificate and the facts on the ground on opposite poles? I can tell you why. The intellectuals are doing a number on President Trump.**

# 77 NOBEL LAUREATES WANT "GAIN-OF-FUNCTION" RESEARCH

Recently, 77 Nobel Laureates rose up in righteous anger and wrote a scathing letter condemning the White House decision to shut down a \$3.7 million grant for coronavirus research. The Nobelists' language camouflaged the crux of the issue: A small but integral part of the money was going to China to intentionally make what amounts to biological weapons. Below NIH experts describe this euphemistically named "gain-of-function" research. The Letter in effect makes two demands: (1) Create away deadly new viruses; (2) Do it offshore, NIMBY.

In the twenty-first century, biology faces a problem that has previously vexed other disciplines such as physics, namely the prospect that its knowledge domain could be used to generate biological agents with altered properties that enhanced their weapon potential. Biological weapons bring the additional dimension that these could be self-replicating, easy to manufacture and synthesized with commonly available expertise. This resulted in increasing concern about the type of research done and communicated, despite the fact that such research often has direct societal benefits, bringing the dual-use dilemma to biology. The conundrum of dual use research of concern was crystallized by the so-called "gain-of-function" type of experiments in which avian influenza viruses were endowed with new properties in the laboratory such as increased virulence and the capacity for mammalian transmission. After more than a decade of intensive discussion and controversy involving biological experiments with dual-use potential, there is no consensus on the issue except for the need to carry out such experiments in the safest conditions possible.

### HISTORY MAY OFFER CLUES

Dr. Francis Collins, Head of NIH, is the supervisor of Dr. Anthony Fauci. Any person with any knowledge of how science works has witnessed how a clueless Fauci has been screwing around with the lives of 300 million Americans. Collins, whose job it was to step decisively

Dr. Francis Collins

Dr. Dipak Das

into this lethal development and set things right for the nation, has been cheering Fauci on. He must now be the focus of attention.

Dr. Collins and Dr. Das are both biologists who stood

at the center of serious allegations of fraud. They were both involved with multiple published papers prepared by junior researchers that were fraudulent.

Both were equally guilty of doing laissez-faire research and of supervisory negligence. None was guilty of the actual commission of the fraud.

Collins came out smelling like roses, and rose to where he is today. He just got a big award for endorsing god.

Das was hounded to death by his university and the media. He had a weak heart and he could not take the stress. His life was cut short at the age of 64.

For the scientific community to posit Collins today as a noble man above the fray is a purposeful attempt to help him evade accountability once again.

# FAILED INSTITUTIONS

Every one of these institutions has been lavishly funded so that they will deal with the unexpected: Like the Armed Forces of a nation. Faced with an unexpectedly formidable enemy, a General does not shake in his boots. He says: *Well, my fellow citizens, we got this.* But Dr. Anthony Fauci is today weeping all over the media how COVID-19 is his "worst nightmare." He is America's worst nightmare.

We've all seen how these agencies have been screwing around, Clouseau-like. Don't let anybody minimize this and spin this as a level-of-difficulty issue. It is not difficult to spot a cockamamie model of how many millions will die. Only the most gullible medical expert will believe in a sudden windfall of an incredible amount of worldwide hospital data, and shut down HCQ. These agencies made the world falsely believe that large numbers of people getting infected is a scary thing: The larger the number, the greater the scaremongering in the Evening News. Increasingly, experts who held opposite views to Fauci are turning out to be correct. The virus runs its course, independent of the degree of intervention. Fauci himself also said from the beginning that the virus will set the timetable, but still he imposed the indefinite and total lockdown. NIAID, CDC, WHO ... the world just survived them.

# THE U.N.: HISTORY MAY OFFER CLUES

M'Bow

Adhanom

## Two Agency leaders US opposed

**Amadou-Mahtar M'Bow** from Senegal was Director-General of UNESCO 1974-1987. Wikipedia: *"In 1984, the Government of the United States announced its intention to withdraw from UNESCO, and American newspaper columnist Flora Lewis, writing in The New York Times, described the organization as "a totally politicized, demoralized bureaucracy whose chief concern is to provide cushy jobs for politicians unwanted at home and a forum for attacking the very concepts Unesco was supposed to serve - human rights for all, press freedom, unrestricted access to culture." Lewis described M'Bow himself as "an ambitious man who has cultivated back-scratching to a fine art". ... "His departure in 1987 followed criticism for administrative and budgetary practices and the US withdrawal from UNESCO in 1984 (followed by the UK in 1985)."*

**Tedros Adhanom Ghebreyesus** (Wikipedia:) *"is an Ethiopian public health researcher and official who has served since 2017 as Director-General of the World Health Organization. Tedros is the first non-physician and first African in the role, who has been endorsed by the African Union. He has held two high-level positions in the government of Ethiopia: Minister of Health from 2005 to 2012 and Minister of Foreign Affairs from 2012 to 2016."* After coming to WHO, Adhanom gave a plum UN assignment to Robert Mugabe (Yes, that one!). Adhanom has a long history of minimizing epidemics both before joining WHO (Ethiopia: 2006, 2009, 2011), and after (Sudan: 2017), causing great harm to the affected public. During COVID-19 Pandemic, he seemed to be doing something similar yet once again. The US then withdrew its support of WHO, saying: "This is a fundamental repudiation of the WHO and its failed mission."

## WOO WOO LEADERSHIP: ONLY FEAR TO OFFER

"Now, we have something that indeed turned out to be my worst nightmare ... In a period of 4 months, it has devastated the world. I mean, 110,000 deaths in the United States, deaths and millions and millions of infections worldwide – and it isn't over yet." – Dr. Anthony Fauci, NIAID, June 10, 2020

## FROM FEAR BE FREE

"-According to the latest immunological and serological studies, the overall lethality of Covid-19 (IFR) is about 0.1% and thus in the range of a strong seasonal influenza (flu).

-Even in global "hotspots", the risk of death for the general population of school and working age is typically in the range of a daily car ride to work.

-The median or average age of the deceased in most countries (including Italy) is over 80 years and only about 4% of the deceased had no serious preconditions. The age and risk profile of deaths thus essentially corresponds to normal mortality.

-In many countries, up to two thirds of all extra deaths occurred in nursing homes, which do not benefit from a general lockdown. Moreover, in many cases it is not clear whether these people really died from Covid19 or from weeks of extreme stress and isolation.

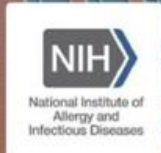

-Up to 30% of all additional deaths may have been caused not by Covid19, but by the effects of the lockdown, panic and fear. For example, the treatment of heart attacks and strokes decreased by up to 60% because many patients no longer dared to go to hospital.

-The normal overall mortality *per day* is about 8000 people in the US, about 2600 in Germany and about 1800 in Italy. Influenza mortality per season is up to 80,000 in the US and up to 25,000 in Germany and Italy. In several countries Covid19 deaths remained below strong flu seasons."

## **NATIONAL INSTITUTE OF ALLERGY AND INFECTIOUS DISEASES**

### **Is Director Fauci a few sandwiches short of a picnic?**

NIAID's current budget is \$5.9 billion per year. Dr. Anthony Fauci has run this institution since 1984. Fauci's salary is nearly \$400,000. During the pandemic Fauci has made, in the name of NIAID, three major decisions concerning the health and wellbeing of American public. Each was patently bogus and bunglingly wrong. America has paid dearly.

- (1). Accepting Neil Ferguson's prediction of COVID-19 death toll, based on a crappy computer program with more holes than a pasta colander.
- (2). Endorsing the fraudulent *Lancet* paper which trashed HCQ.
- (3). Totally ignoring the world experts in the field and saying that for America, it is his way or the highway. Some experts were right.

The question that needs to be asked is this: **Did each of these steps emerge from extensive scientific consultation percolated within NIAID, or was Fauci the megalomaniac acting alone?**

CORONAVIRUS: BOTCHED U.S. RESPONSE

## **COLLINS BLAMES AMERICAN FREEDOM, NOT FAUCI'S LETHAL SCREW-UPS**

TIME Magazine interview of Dr. Francis Collins, Head of NIH, and Dr. Anthony Fauci's boss, on 11 June 2020:

**TIME: Why do you think the U.S. has not been able to manage the pandemic as well as other countries?**

**Collins:** The U.S. is a big sprawling country, with people who have very strong opinions about who's allowed to tell them what to do. And so even in circumstances where efforts were made early on to try to encourage people to take care about not distributing the virus by their own behavior, it took a while for that to click in. We're not China. We don't have an authoritarian government who can basically say now hear this. We are basically a sort of a bottom up public health system, not a top down. And we're counting on the American public, now that they've had the information, to act accordingly.

The blame for poor U.S. response has nothing to do with any of the above. This is called red-herring fallacy. The blame belongs solidly to Collins-Fauci and Co., the pampered, pompadoured incompetents who coercively dictated what the U.S. approach should be. This approach did not emphasize protecting the vulnerable and leaving the rest alone – a key strategy true experts worldwide long recognized. Most glaringly, the American experts repeatedly ran with transparently bogus studies and questionable data bases to formulate national response. All the vaunted expertise in the lavishly-funded U.S. institutions amounted to naught for the fallen in the hour of their death. Experts failed, institutions failed, and the media aided and abetted. Collins is advancing a sociopolitical notion that US would be better off (public health-wise) with a China-like system. Americans were told: *Now hear this!*

# **DR. FAUCI FOR JOBLESS MILLIONS:**

## ***He's paid \$400,000 to screw you over***

Fauci says he hates computer models.

But he shut down America based on one, anyway.

### **President Trump on shutting down U.S.**

*President Trump:* The big projection (from model) being that 2.2 million people would die if we did nothing. That was another decision we made, close it up. That was a big decision that we made. Two very smart people (Fauci and Birx) walked into my office and said listen these are your alternatives. And that was a projection of 1.5 to 2.2 million people would die if we didn't close it up. That's a lot of people. – 8 April 2020

### **Fauci interviewed on FOX weasels out**

*Q:* Those models were what were used to shut down the United States economy. What kind of model is so far off that it leads to policy-making decisions that now are having such dire consequences?

*Dr. Anthony Fauci:* First I think it is important to point out that it isn't the model – or the result of the model – that led to the decision to have such strong mitigation program such as physical separation. You don't have to look at any model. Take a look at what happened in China, take a look at what happened in Northern Italy – how the hospitals were completely overwhelmed and the draconian methods that had to be taken to turn down the outbreak. So, I mean if I never saw the result of a model, that alone would clearly indicate that something rather significant needed to be done to prevent the threat. So again – getting back to the problem of model – I never argue with anyone that has a problem. I inherently have problems with models. – 10 April 2020

## CORONAVIRUS PANDEMIC

# RELAX EVERYONE, FAUCI'S BEEN LEASHED

A *Time Magazine* interview with Dr. Francis Collins (Dr. Anthony Fauci's boss) on 11 June 2020 reveals that the supervisor has been coopted to the Coronavirus Task Force. This means that Fauci is no longer the Alpha Dog there.

### **Why did you feel the need to join him?**

I was invited, it made me feel that the White House is interested in getting even additional scientific input. I see that the task force is shifting its emphasis now even more in the direction of the scientific arguments about what we need to do next and particularly about treatments and vaccines and how can we speed that up. I'm right in the middle of that, so it makes more sense now.

Lately, Fauci has been lashing out in the media on a daily basis on how the tide of events is leaving him behind. He can scaremonger all he wants but he won't have any traction anymore. America is on the move. People understand that there are risks, and they have to be factored in. Fauci is a dog that won't hunt.

There is never an overriding argument in science to cause people to suffer *en masse*. Fauci has engaged in perversion and bastardization of science. Those who are promoting and protecting him have engaged in perversion and bastardization of our civilization.

## **FAUCI CLAIMS HE SAVED MILLIONS OF LIVES; GLORIES ON BEING A CHICK MAGNET; Explains he is a symbol**

Dr. Anthony Fauci's image repair campaign proceeds apace. Here, for example, an interview dated 17 June 2020 done at HHS at public expense. In this seemingly free-wheeling interview, he actually defends himself against his critics, and holds himself out to be the end all. A little sampling of the ramblings of this megalomaniac:

**"Michael Caputo:** And I noticed that you're always frank. You stick with the science. And that confuses some people.

**Anthony Fauci:** ...This was unprecedented, you know, and when you give advice about what should you be doing, should you be out there, should you be shutting down earlier versus later? I mean, people get confused. And they say, "Wow, you know, we shut down and we caused a great disruption in society. We caused great economic pain, loss of jobs." But if you look at the data, now that papers have come out literally two days ago, the fact that we shut down when we did and the rest of the world did, has saved hundreds of millions of infections and millions of lives. And yet, there are those who say, "You shut down, you did destructive things by disrupting the economy." And others say, "Well, if you save so many infections by shutting down, why didn't you shut down two weeks earlier? You could have saved many more lives." ...

**MC:** I mean, I can tell you that the older, you know -- like, my mother thinks that you hung the moon, you know, and, you know my wife -- I mean, I don't know what it is. You just got this magnetism.

**AF:** Well, I think it's more of a symbol of what the American people want. They want someone who speaks honestly to them. They want someone who gives them the truth based on data. And they feel the need for that, so I become a symbol. And all of that other stuff that, you know, sex symbol, Brad Pitt stuff, it's kind of interesting."

*Sancta Maria, Mater Dei, ora pro nobis peccatoribus,  
nunc et in hora mortis nostrae. Amen.*

Q: So what should be done about him?

A: Nothing. He is a goner. White House has brought in Fauci's boss to sit with him. Then Fauci has been put in a purple box of the organizational chart of coronavirus response. This purple box has been shunted way to one side with no connection to any operational groups. Fauci's a goner.

CORONAVIRUS PANDEMIC

# FAUCIANA

On Wednesday, 8 July 2020, PBS Newshour reported that the White House had asked Dr. Anthony Fauci NOT to come to the Coronavirus Task Force meeting.

Next day, Thursday, Dr. Fauci lashed out: "I'm gonna see it through and the country's gonna see it through."

Which raises the question: How? If he has no official authority to do anything or even recommend anything, what is it exactly that he's gonna do? Scare the wits out of Americans with some more jawboning? At least his role model Jason Voorhees had a machete and a hockey mask to scare with.

Also, on Tuesday, Fauci's echo Dr. Ashish Jha declared: "I want clear leadership to bring this outbreak under control."

"I want"? Jawohl, Mein Führer! Such dictatorial language! Notice both are using this type of language now. I mean, who do these people think they are? Attila the Hun and Genghis Khan?

07/09/2020

## CORONAVIRUS PANDEMIC

### **THE FAUCI-GOOD-TRUMP-BAD NARRATIVE**

Americans are being nightly accustomed to this narrative by the mainstream media. Then the media turns around and does a poll. The result: Fauci-good-Trump-bad. Surprise!

**The position taken by the White House on the pandemic (*America is in a good place, open schools fully, rising infection numbers are not of debilitating concern*) is a thorough science-based approach – and not a whimsical dictate. This approach has been long and consistently voiced by respected medical experts like Dr. Scott Atlas.**

Fauci has never applied himself to actually doing any good. All he has done to date is to face the camera and go yak, yak, yak. If he was well motivated, the first thing he would have done at this stage is to implement a nationwide program to protect the vulnerable and, equally importantly, let the rest roam free. Absolutely no one would have stood in his way. But doing is hard, yakking is easy. The eightyish man sees here a way to end his shooting-star career with a bang: The ultimate power trip – being a kingmaker.

Trump will probably lose the election – partly because of Fauci's machinations. And why is Fauci able to do this? When Trump first wanted to sideline Fauci, he (Trump) got calls from some "respectable people" urging him not to sideline Fauci. Trump gave in. It is because of a privately deferential Trump that Fauci remains on the scene. A health official without an ounce of compassion for the public, Fauci today is turning Americans to Stepford Wives, with well-crafted imagery like "worst nightmare", "perfect storm", "we're knee deep in the first wave", "we're going in the wrong direction", "the virus has undergone deadly mutation". I know all there is to know about corrupt scientists in high places. Fauci is one.

CORONAVIRUS PANDEMIC  
**DR. ANTHONY FAUCI AND  
THE NATURAL ORIGIN OF COVID-19 VIRUS**

**MAY 4, 2020:** Fauci interviewed by *National Geographic* categorically and summarily dismissed that the virus was anything other than natural:

“If you look at the evolution of the virus in bats and what's out there now, [the scientific evidence] is very, very strongly leaning toward this could not have been artificially or deliberately manipulated ... Everything about the stepwise evolution over time strongly indicates that [this virus] evolved in nature and then jumped species,” Fauci says. Based on the scientific evidence, he also doesn’t entertain an alternate theory—that someone found the coronavirus in the wild, brought it to a lab, and then it accidentally escaped.

**JULY 3, 2020:** A *Nature* summary of the current state of research into the origin of the virus:

To unequivocally trace the virus’s journey to people, scientists would need to find an animal that hosts a version more than 99% similar to SARS-CoV-2 — a prospect complicated by the fact that the virus has spread so widely among people, who have also passed it to other animals, such as cats, dogs and farmed mink.

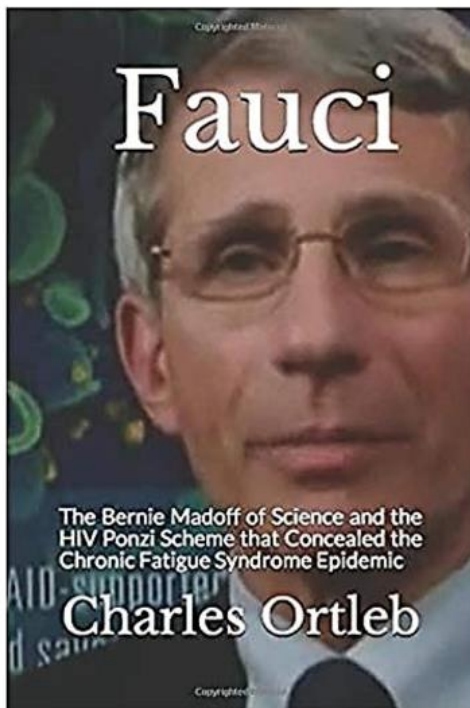

Zhang Zhigang, an evolutionary microbiologist at Yunnan University in Kunming, says efforts by research groups in China to isolate the virus from livestock and wildlife, including civets, have turned up bare. Groups in southeast Asia are also searching for the coronavirus in tissue samples from bats, pangolins and civets.

**So, Fauci was confidently lying in the name of science. He did not have Clue One as to what he was talking about. He has been a consistent misinformant. There are new reports that this serious non-natural origin issue - which Fauci quashed – is not over.**

# FAUCI: THE DEIFIED MONSTER

Given the fact that Anthony Fauci has been at the center of one of the biggest medical cover-ups in history, it is shocking that anyone is putting their trust in him during the COVID-19 pandemic.

While mistaken members of the media like Laurie Garrett and Rachel Maddow have called Anthony Fauci "a great American," Dr. Fauci will soon take in his place in history as the chief operator of a Ponzi scheme that has plunged the world into a dystopian medical darkness of fraud, deceit, and neglect.

This book is a must-read chapter from *The Chronic Fatigue Syndrome Epidemic Cover-up Volume Two* with a new afterword that explores the extensive damage Fauci's Ponzi scheme has done to the Chronic Fatigue Syndrome community, people stigmatized with "HIV/AIDS," and everyone suffering from the viruses that Fauci's cover-up has been concealing from the world: the HHV-6/7/8 family of viruses. The list of the potential victims of Fauci's Ponzi scheme includes virtually everyone. Even the health of millions of doctors and nurses has been put at risk.

WHERE IS DR. FRANCIS COLLINS, FAUCI'S BOSS, AT THIS CRITICAL JUNCTURE FOR THE NATION? WHY DOESN'T HE COME FORWARD AND EITHER DEFEND FAUCI OR REMOVE HIM? WHY DOES HE LET THE WHITE HOUSE BEAR THE BRUNT FOR THE JOB HE'S BEING PAID TO DO? WHERE IS THE MEDICAL SCIENCE ESTABLISHMENT AT THIS JUNCTURE FOR THE NATION? SURELY THEY KNOW EXACTLY WHO AND WHAT FAUCI IS – WITH HIS PRIVATE AGENDAS AND ALLIANCES, AND HIS DERISIVE DISMISSING OF ALL SCIENTIFIC EXPERTS!

# **FAUCI WAS FULLY FIGURED OUT IN 1995**

*(Excerpts from Larry Kramer's Open Letter, 12 May 1995)*

Anthony Fauci, you are a murderer because you oversee government sponsored clinical trials that test and retest combinations of immunosuppressive, toxic therapies that kill people with HIV. The majority of U.S. clinical trials involve worthless antivirals like AZT combined with some other drug (generally another toxic antiviral). What these tests have proven is that you are able to piss away billions of dollars testing dangerous compounds that DO NOTHING to improve the quality of life, to stop opportunistic infections or to extend survival for people with HIV. ...

Anthony Fauci, you are a liar because you have known for years that CD4 counts are a travesty of a surrogate marker that, through drug company coercion, have been elevated to the status of "a standard." Now that everyone else knows it too, you and your corporate drug company cronies are urging researchers to foist another useless marker, peripheral blood viral load counts, on our frightened, desperate community. ...

Your scheme isn't too difficult to figure out; promote another invalid surrogate marker that has no relation to health or life expectancy of PWAs; develop a test that costs \$200-\$300 to measure this invalid marker; encourage the creation of more deadly drugs that effect this invalid marker; and then compare the pathetic results you get from these deadly drugs to the more pathetic results you got from AZT and other nukes. In the eyes of the government everybody wins. Companies that sell drugs and market tests get rich and PWAs who sacrifice their bodies in your trials of death are eliminated from the face of the earth. ...

You are a pill-pushing pimp that cooperates with drug companies in forcing dangerous concoctions down the throats of a desperate community that is brainwashed into believing that taking a pill, any pill, will help them. AIDS drugs are not sold to help people, they are sold to make a profit. ...

Ten years of hope? Fuck that. Try a decade of death and greed. Go back to Washington you bastard.

## CORONAVIRUS PANDEMIC

### **THE TRAGICAL HISTORY OF DOCTOR FAUCI ?**

Dr. Anthony Fauci may quite possibly be the most powerful doctor today, backed by ex-Presidents, tycoons, celebrities, Big Pharma bosses, politicians, the mainstream scientific establishment and the media. This righteously indignant pro-Fauci campaign today, what do they hope to achieve?

Let's say they get all they want. The White House makes an about-face, and says: OK, Dr. Fauci, you are the boss. We are all at your service. Come here and call the shots. We will follow your instructions. The White House podium is all yours. You da man!

This will be the kiss of death for Dr. Fauci. For there are only two things he can actually do – yak and fearmonger (the latest: “the Mother of all pandemics”). When it comes to the hard work of making intricate nationwide plans and implementing them, the eighty-year old will freeze up. In a matter of days his true nature will be in public view, and there will be no one to assign blame to anymore but himself.

Fauci's friends are egging him on towards some tragic Faustian disaster *for him*. If he had a true friend, the advice might be this: Tony, disengage from this dangerous entanglement. Go back to the lab and do some science. Save what you have achieved. *A wise man never plays leapfrog with a unicorn.*

## CORONAVIRUS PANDEMIC

# COMPARE AND CONTRAST

### ***America is going to hell in a handbasket***

Dr. Anthony Fauci, MD, is of the view that we are going through the "Mother of all Pandemics", that this is his "worst nightmare", that America is headed in the "wrong direction" because young people are behaving irresponsibly, that we are still "knee deep in the first wave". He favors repeated application of brake, and sees no limit to how long he can do this. He says economy is not his concern, but stands in the way of people who try to restart the economy. He exults in being America's symbol of truth. He is totally devoid of any compassion for the people he serves. The guy is a self-worshipping automaton with a halogen halo around the head.

### ***America is doing OK***

Dr. Scott Atlas, MD, believes we are pretty much done with the Pandemic, and we need to resume normal life while protecting the vulnerable. He sees as "hysteria" the daily scaring of Americans with rising numbers of infections. He believes schools should start functioning normally, with any vulnerable (elderly) people protected. Dr. Atlas never talks about himself, but he comes through as a deeply compassionate custodian of public health. Many top-flight experts worldwide share his views. Dr. Atlas is where America's spirit pulsates.

# DR. FAUCI LIES

Dr. Anthony Fauci made many idiotic and bungling errors. On or about July 15, he issued a blanket denial he ever made any mistakes. His point is that any decisions he made were correct at the time he made them, based on the information available at that time: "I stand by everything I said. Contextually, at the time I said it, it was absolutely true."

This is a totally false assertion. Take just two examples:

- When Fauci used the Ferguson model to shut down America, it was absolutely clear - then and there - that this result was a piece of crap. Even social-media pounced on it immediately. Moreover, Ferguson was widely known to have made many wildly exaggerated death predictions. Every bit of information needed to conclude the result was wrong was available when Fauci made his fateful decision that destroyed the nation.
- The *Lancet* paper trashing HCQ was a ludicrous thing when it was published. It used an incredibly extensive hospital data base the likes of which were not known to exist at that time. Fauci's institution would have instantly known - then and there - that the data base was a fraud. Yet, Fauci endorsed the result, perhaps causing many avoidable deaths.

Weasel-word Fauci is devious and deceitful, dishonest and dishonorable. In sum, he is evil. Until America acknowledges this, she is doomed.

## COMBATting CORONAVIRUS PANDEMIC

### **NOBELISTS DARE BUT FAUCI SCARES**

#### **Scientists call for volunteers to be exposed to the coronavirus to test vaccines**

PUBLISHED THU, JUL 16 2020•5:29 AM EDT | UPDATED 2 HOURS AGO

"In such ("challenge") trials, volunteers still receive the vaccine candidate or a control. Instead of resuming life as usual and waiting to 'catch' a virus, volunteers are deliberately exposed to the pathogen under controlled conditions. Beyond being faster than conventional trials, a challenge test is likelier to conclude with interpretable results, e.g. should the presence of virus around the study site begin to fade over time." – 15 Nobel Laureates + others (CNBC)

#### **Dr. Anthony Fauci pleads with young people: 'You're propagating the pandemic'**

PUBLISHED THU, JUL 16 2020•5:36 PM EDT | UPDATED 3 HOURS AGO

"To think young people have no deleterious consequences is not true. We're seeing more and more complications in young people. ... some get mild symptoms and some get symptoms enough to put them at home for a few days. Some are in bed for weeks and have symptoms even after they recover, others go to the hospital, some require oxygen, some require intensive care, some get intubated and some die." – Dr. Anthony Fauci (CNBC)

You don't have to be a medical expert to see the diametrically-opposite nature of the two views. The proposed trial presupposes that the progress of the disease in the intentionally-infected subjects will be in a like manner. Fauci says the disease in each subject will manifest in an unpredictably different way. So, there can be no clinical-trial "group".

Dr. Anthony Fauci

# THE MEOWING TREED CAT

The intense media blitz you are witnessing now – with all kinds of scientific authorities and celebrities and media pundits coming out in force to support Fauci against some great injustice done to him – is the most effective thing I can point you to as the manifestation of wholesale corruption of the American intelligentsia.

Anthony Fauci is a ruthless self-promoter who sought power and glamor all his career. Science is the vehicle he chose. I would take seriously what Larry Kramer – who was a socially aware person – said about him. Fauci's cronies have helped him all his life, transforming him into a "National Treasure" and "a great American" and "America's doctor." For months now Fauci has been a bungler within the mantle of science and evidence and data, and has shut out true experts who could have healed the nation with so much care and compassion.

Where has all this brought Fauci himself to? The media has coaxed him up a tall tree. He is a meowing treed cat. No one to help him down. He is shamelessly croaking into the public ears and glaring into the public eyes that he is doing a pretty good job, that he is respectable, that he speaks truth to power, that he is America's symbol of trustworthiness. When he appeared on *PBS Newshour* on Friday 17 July 2020, he was embarrassingly obsequious towards the anchorperson, and was pathetically making nice to the White House. Fauci has lost all dignity. He has become an unfunny Rodney Dangerfield.

## CORONAVIRUS PANDEMIC

### **LAB ORIGIN OF NEW CORONAVIRUS**

The hypothesis that the new coronavirus originated in a lab has been kept ruthlessly suppressed by the Pandemic science establishment. It has been described as a product of conspiracy theories and/or profit motive. The papers are denied peer-reviewed publication. The proponents are dismissed derisively. The idea is considered laughable. Now, consider two clear points:

(1). In a natural-origin setting, the virus would jump from an animal species to humans. The virus in the animal species would be 99% similar to that in the human species. To date, best efforts of the top virus scientists worldwide have failed to find this animal species which should actually be ubiquitous, given the exceptionally high infectivity of the virus.

(2). A respectable Norwegian-British team has been investigating the issue. They find features in the new coronavirus that are not known in nature and are all, at the same time, particularly suited to infecting humans virulently. These features could be "natural" in the sense that they are not "engineered". If a whole bunch of different natural coronaviruses are mixed in with human cells in the lab dish, a few viruses will adapt to efficiently infecting the human cells. These viruses could be isolated. These are the candidate "new coronavirus" of lab origin – having somehow made their way to the human population. A perfectly reasonable and happenable scenario – nothing to laugh at here.

To quash this line of investigation is the real conspiracy.

DR. ANTHONY FAUCI

DR. CHRISTINE GRADY

DR. FRANCIS COLLINS

Dr. Francis Collins is the boss of Dr. Anthony Fauci and Dr. Christine Grady who is Fauci's wife. They all go back a long way, and are surely close family friends. Fauci, ten years older than Collins, is a mentor to the latter and may have been instrumental to Collins becoming the Head of NIH. Fauci himself could have had this job, but chose to remain the Head of NIAID instead. So, Collins is Fauci's boss because Fauci wanted him to be.

Collins has been lately singing Fauci's paeans to high heaven. Recently he was asked if he would fire Fauci if ordered to do so. Collins said he could not imagine such a situation developing. But if it came to that, he said he would defend Fauci. Asked whether he would rather resign himself than fire Fauci, he did not respond.

There is no excuse for Collins to not understand how much harm Fauci has done to the nation. But it is clear that he would rather see the nation go down the tube than deal with Fauci. If you work within a large organization, you probably know how insidious a force cronyism can be. That is what we are witnessing.

CORONAVIRUS PANDEMIC – HISTORY MAY OFFER CLUES  
**WHAT IS THE NAME OF FAUCI'S GAME?**  
***BLAME THE PRESIDENT!***

Twice in his career, Dr. Anthony Fauci plunged America into a dystopian public health regime through his incompetent bungling. Both times he blamed the sitting President and clean got out of his mess, with the reputation of a noble warrior fighting great evil.

During the HIV health crisis, Fauci's continued bungling came to a head when protests broke out and he was burned in effigy. In order to save his butt, he cleverly made peace with the protesters and corrected the error of his ways. He then blamed President Ronald Reagan for not supporting his program. He emerged as a noble conciliator.

During the COVID-19 Pandemic, Fauci's signature bungling was once again in evidence. He blamed President Donald Trump for not supporting his program early on. He is today passing as a noble soul tormented by unjust forces. The people of America are not being told about numerous expert studies worldwide showing that intervening sooner would have had no effect, since the virus runs its course regardless of mitigation.

## CORONAVIRUS PANDEMIC: THE TRAGEDY SHAPING

### ***How much land does a man need?***

A farmer named Pahom had great hunger for land. One day he heard that the Bashkir tribesmen were practically giving away huge amounts of land – with a small condition. Pahom had to pay one thousand rubles. Then he would pick a starting point, and start running from there at sunup. He must return to that spot by sundown. Whatever amount of land was enclosed by his route would be all his. He could do this each day. On his first day, Pahom dug a little hole with a spade to mark the starting point, and set out to make a very great loop. As the sun started to set, he realized he was still far from the hole. So, he ran faster and faster until he barely made it to the hole. There he dropped dead out of sheer exhaustion. They took his spade and widened the hole to a six-foot ditch. They buried him in it. *How much land does a man need?*

*Only six feet.* (from Leo Tolstoy)

Among Dr. Fauci's many vaunted contributions to epidemiology is the program to weaponize coronavirus to most efficiently attack humans. He wanted to play with deadly lab-engineered viruses. This way he wanted to develop deep understanding so he could be prepared with extreme science for the next outbreak. When the outbreak came, he was screwing around at the crassest possible level of science: Running with the transparently quack Ferguson model and endorsing the blatantly fraudulent study trashing HCQ. He then tried to authoritatively preempt any inquiries into his bioweapon's possible role in the Pandemic.

"We've got to do the things that are very clear that we need to do to turn this around. Remember, we can do it. We know that when you do it properly, you bring down those

cases. We've done it. We've done it in New York." –  
Dr. Anthony Fauci, 17 July 2020 PBS TV

"We've seen surges in coronaviruses in the midst of lockdown. New York had a lockdown and had 30,000 people die. New York had the worst death rate of any place in the world amid a lockdown, so perhaps a lockdown didn't do any

good and perhaps a lockdown killed our economy, but didn't do anything to stem the tide of the virus. So I see nothing to be admired in New York's lockdown.

"I see a mountain of people who died, particularly in the nursing homes. I don't think the lockdown did them any good. I think it killed the economy, but didn't do any good for trying to contain the virus." -

Sen. Rand Paul MD (R-Ky) 23 July 2020 Fox News

There you have it. Fauci himself points to New York as the best he can do. NY is one of the worst-faring places among US states and the nations of the world. So, by Fauci's own assessment, his way is no way.

*An open letter to America's decision makers, on behalf of health professionals across the country.*

Dear decision makers,

### Hit the reset button.

Of all the nations in the world, we've had the most deaths from COVID-19. At the same time, we're in the midst of "reopening our economy," exposing more and more people to coronavirus and watching numbers of cases – and deaths – [skyrocket](#).

Here's a little more of what they want. But there's more.

### Shut it down now, and start over.

Non-essential businesses should be closed. Restaurant service should be limited to take-out. People should stay home, going out only to get food and medicine or to exercise and get fresh air. Masks should be mandatory in all situations, indoors and outdoors, where we interact with others.

This is the third "open letter" with similar message that has surfaced recently, with the authorship totaling a few thousand experts.

(2). While not accepting any blame himself, he has been doing the rounds of the media, blaming "frolicking" American young, virus-spreading American bargoers *et al*.

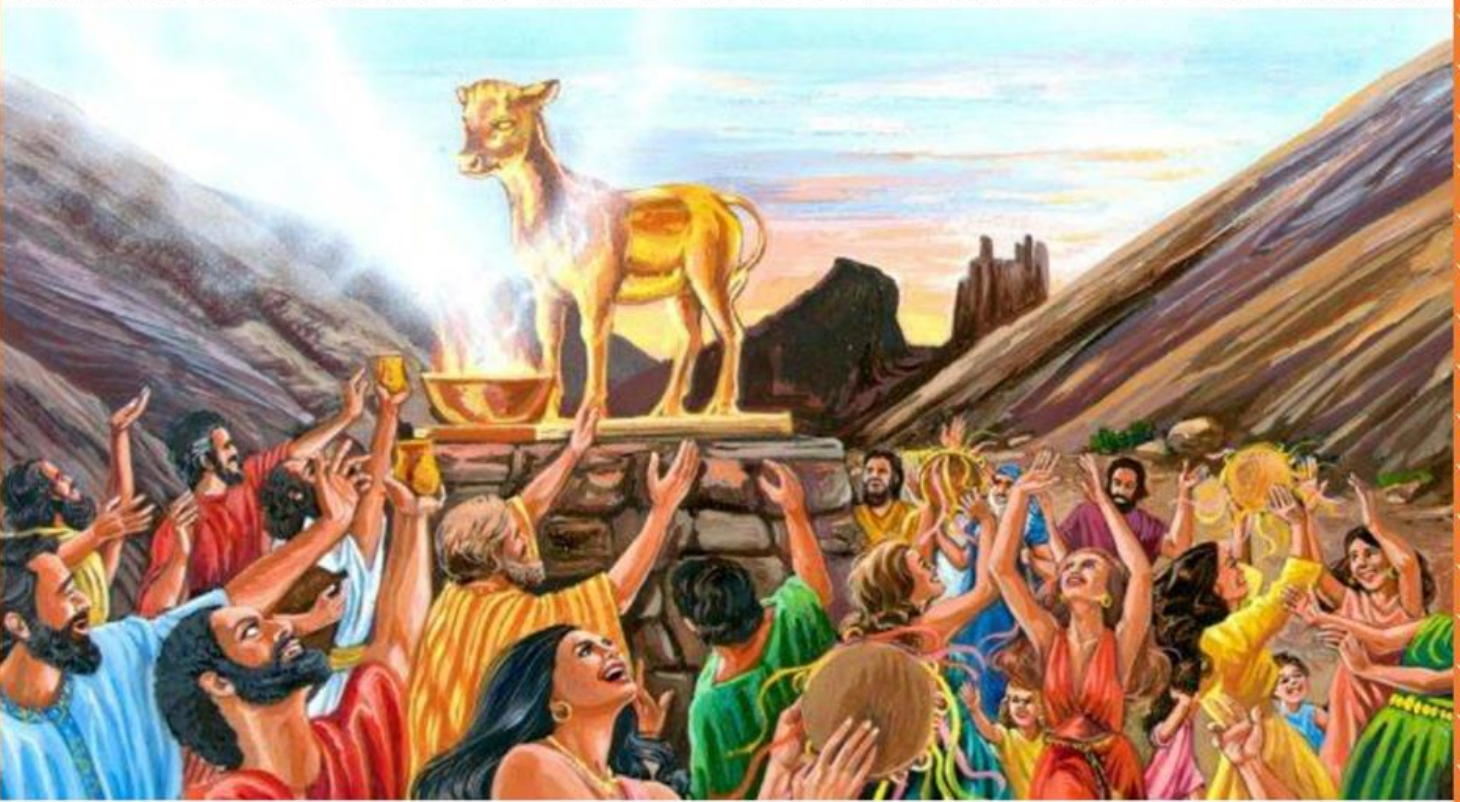

(3). Fauci the pandemic crisis czar is spending an inordinate amount of time with the media – both news and entertainment. The media is using him to railroad President Trump, and he is using the media to repair his own tattered image. A Faucian bargain.

## DR. FAUCI IS A NASTY PIECE OF WORK

As I have been pointing out, the many bad things the good doctor has done in his time are all today somehow well-hidden from public view.

You will never find out about this hombre's shady past unless you go

digging. There is, for example, a great deal to know about his power-drunk ramming through of the extremely dangerous bioweapons program hidden under a cloak of government secrecy – aided by none other than Dr. Francis Collins. These two have long ridden roughshod over scientific critics.

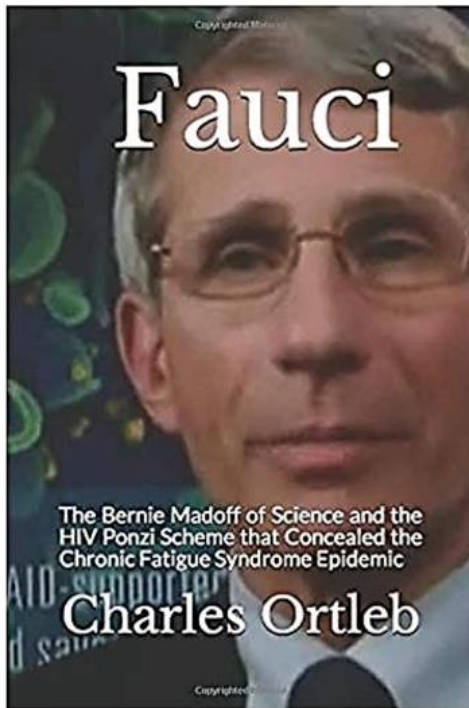

Many, many well-regarded mainstream researchers (NOT conspiracy theorists) have strenuously objected to this program – but to no avail. They objected because it was

extremely dangerous; because there was absolutely no scientific benefit to this; because of the inexplicable veil of secrecy. Now they point out that the probability of a lab origin of the COVID-19 virus remains discussible and even likely, contrary to Fauci's butt-covering assertion.

# FAUCI: THE DEIFIED MONSTER

Given the fact that Anthony Fauci has been at the center of one of the biggest medical cover-ups in history, it is shocking that anyone is putting their trust in him during the COVID-19 pandemic.

While mistaken members of the media like Laurie Garrett and Rachel Maddow have called Anthony Fauci "a great American," Dr. Fauci will soon take in his place in history as the chief operator of a Ponzi scheme that has plunged the world into a dystopian medical darkness of fraud, deceit, and neglect.

This book is a must-read chapter from *The Chronic Fatigue Syndrome Epidemic Cover-up Volume Two* with a new afterword that explores the extensive damage Fauci's Ponzi scheme has done to the Chronic Fatigue Syndrome community, people stigmatized with "HIV/AIDS," and everyone suffering from the viruses that Fauci's cover-up has been concealing from the world: the HHV-6/7/8 family of viruses. The list of the potential victims of Fauci's Ponzi scheme includes virtually everyone. Even the health of millions of doctors and nurses has been put at risk.

WHERE IS DR. FRANCIS COLLINS, FAUCI'S BOSS, AT THIS CRITICAL JUNCTURE FOR THE NATION? WHY DOESN'T HE COME FORWARD AND EITHER DEFEND FAUCI OR REMOVE HIM? WHY DOES HE LET THE WHITE HOUSE BEAR THE BRUNT FOR THE JOB HE'S BEING PAID TO DO? WHERE IS THE MEDICAL SCIENCE ESTABLISHMENT AT THIS JUNCTURE FOR THE NATION? # **FAUCI WAS FULLY FIGURED OUT IN 1995**

*(Excerpts from Larry Kramer's Open Letter, 12 May 1995)*

Anthony Fauci, you are a murderer because you oversee government sponsored clinical trials that test and retest combinations of immunosuppressive, toxic therapies that kill people with HIV. The majority of U.S. clinical trials involve worthless antivirals like AZT combined with some other drug (generally another toxic antiviral). What these tests have proven is that you are able to piss away billions of dollars testing dangerous compounds that DO NOTHING to improve the quality of life, to stop opportunistic infections or to extend survival for people with HIV. ...

Anthony Fauci, you are a liar because you have known for years that CD4 counts are a travesty of a surrogate marker that, through drug company coercion, have been elevated to the status of "a standard." Now that everyone else knows it too, you and your corporate drug company cronies are urging researchers to foist another useless marker, peripheral blood viral load counts, on our frightened, desperate community. ...

Your scheme isn't too difficult to figure out; promote another invalid surrogate marker that has no relation to health or life expectancy of PWAs; develop a test that costs \$200-\$300 to measure this invalid marker; encourage the creation of more deadly drugs that effect this invalid marker; and then compare the pathetic results you get from these deadly drugs to the more pathetic results you got from AZT and other nukes. In the eyes of the government everybody wins. Companies that sell drugs and market tests get rich and PWAs who sacrifice their bodies in your trials of death are eliminated from the face of the earth. ...

You are a pill-pushing pimp that cooperates with drug companies in forcing dangerous concoctions down the throats of a desperate community that is brainwashed into believing that taking a pill, any pill, will help them. AIDS drugs are not sold to help people, they are sold to make a profit. ...

Ten years of hope? Fuck that. Try a decade of death and greed. Go back to Washington you bastard.

## IS DR. FAUCI MR. SCIENCE?

Dr. Anthony Fauci, the US Pandemic Czar, is in the constant habit of saying he is following science, data, and evidence. This statement serves as the most effective palliative for the populace at large, and the most reassuring soundbite for the policy-makers. There are now numerous "Open Letters" out – signed by thousands of medical experts and/or academic intellectuals – all basically insisting in strong language that:

1. Dr. Fauci *and Dr. Fauci alone* stands for science.
2. The pandemic leadership *must be* surrendered 100% to him.

Over the past few months, the science we have seen coming out of Dr. Fauci is quackery (Neil Ferguson Model) and charlatanism (endorsing Sapan Desai fraud.) The only leadership we have witnessed during this same period is yakking, posturing and – most grotesquely – acting like a sleazy glamor hound in the middle of a hellfire of national suffering.

To say that Fauci today stands for science is to not know what science is. And the idea that the nation should be surrendered to Fauci's dictates is criminally insane.

Discount all this daily fearmongering of the mainstream media with bogus numbers. America is on the mend. Avoid being suffocated by the miasma of Fauci's morbid pessimism. The Germans have a saying: *Der einzige Mist, auf dem nichts wächst, ist der Pessimist.* (The only manure on which nothing grows is a Pessimist.)

## **CORONAVIRUS PANDEMIC: LAB ORIGIN OF VIRUS**

The bullet points from a detailed article in the *Bulletin of the Atomic Scientist* entitled "Did the SARS-CoV-2 virus arise from a bat coronavirus research program in a Chinese laboratory? Very possibly" By Milton Leitenberg, June 4, 2020. I would add 9. *Fauci's attempts to preempt inquiries.*

1. *Official Chinese government recognition early in the SARS-CoV-2 outbreak of biosafety inadequacies in China's high containment facilities.*

2. *Recognition by Zhengli Shi, a renowned scientist who leads a research team at the Wuhan Institute of Virology, that a laboratory escape was a possibility.*

3. *Questions surrounding Chinese government attribution of the Wuhan's Huanan South China Seafood Market as the source of the SARS-CoV-2 virus.*

4. *Suppression of information and individuals by Chinese authorities.*

5. *Laboratory accidents and the escape of highly dangerous pathogens from laboratories are frequent occurrences worldwide.*

6. *There have been laboratory accidents and escapes of highly dangerous pathogens in China in general and biosafety issues at the Wuhan Institute of Virology in particular.*

7. *Under what biosafety conditions was bat coronavirus research carried out at the Wuhan Institute of Virology?*

8. *What is the nature of the research being carried out in Zhengli Shi's laboratory at the Wuhan Institute of Virology?*

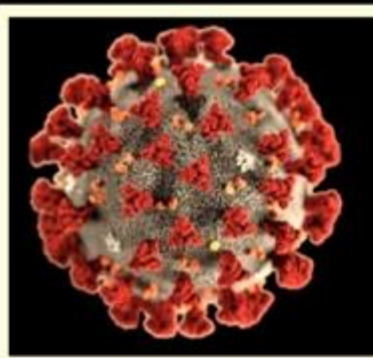

**Final comments.** On April 30, Newsweek described a report produced by the US Defense Intelligence Agency which stated that "in early February, China's Academy for Military Medical Sciences 'concluded that it was impossible for them to scientifically determine whether the Covid-19 outbreak was caused naturally or accidentally from a laboratory incident.'" The author of a newly published paper analyzing the genome of SARS-COV-2 reported that "the COVID-19 virus is exquisitely adapted to infect humans... The virus's ability to bind protein on human cells was far greater than its ability to bind the same protein in bats, which argues against bats being a direct source of the human virus."

Dr. Anthony Fauci, NIAID

"This virus does things that no other virus does."

Dr. Paul Offit, director of the Vaccine Education Center at Children's Hospital of Philadelphia

"It started to become obvious that this was something that was unprecedented in our lifetimes."

Dr Eric Toner, Johns Hopkins Center for Health Security

"The virus's ability to bind protein on human cells was far greater than its ability to bind the same protein in bats, which argues against bats being a direct source of the human virus."

Dr. Milton Leitenberg, University of Maryland

"In the end, it will be very difficult, or even impossible, to prove or disprove the theory that the virus escaped from a lab."

Dr. Milad Miladi, University of Freiburg in Breisgau, Germany

There are many similar observations that come not from conspiracy theorists but from objective professionals. Common sense then tells us ordinary folks that the lab origin (non-natural origin) should be a primary focus. Heed Zimbabwe proverb: *That which has horns cannot be wrapped.*

# CORONAVIRUS PANDEMIC: VACCINE DESIGN **IS LAB ORIGIN OF VIRUS A MATTER OF URGENT CONCERN?**

There is a growing view that the investigation of lab origin of the novel coronavirus is imperative. The medical science establishment has pooh-poohed this idea and so, if that's final for you, read no further.

Now, some might say: Sure, let's have that investigation *after* we get through with the pandemic.

I am no expert on these matters and so I go by what I read. It has been explained that the design of the vaccine depends on whether or not the virus is of lab origin (not necessarily lab "engineered".) All the American vaccine efforts are tacitly based on the assumption that the virus is of natural (zoonotic) origin. If it is something else, these advance-stage vaccine programs may have been misdirected.

A Norwegian-British scientific team led by Birger Sørensen is engaged in both investigating lab origin and designing a vaccine thusly. Here's what they say:

*"Mistaken assumptions about SARS-CoV-2's aetiology risk creating ineffective or actively harmful vaccines, including the risk of Antibody-Dependent Enhancement (ADE). Such problems in vaccine design are illustrated from past experience in the HIV domain."*

(aetiology = manner of causation of a disease or condition)

Thinking people with some science orientation should see the clear implication and serious concern here.

## CORONAVIRUS PANDEMIC: LAB ORIGIN OF VIRUS **VIEW FROM INTELLIGENCE AGENCIES** **U. S. INTELLIGENCE**

... a majority of the 17 agencies that provide and analyze intelligence for the US government concurred in May that they believe the pandemic started after the virus leaked from a Wuhan lab, a claim based mostly on circumstantial evidence.

Sen. Tom Cotton, meanwhile, who is a member of the US Senate Select Committee on Intelligence, bolstered his lab leak argument with details based on unclassified general information: "All the evidence at this point points to two labs in Wuhan, while no evidence at all points to the wet market in Wuhan. The fact that they research coronaviruses, that they used bats, that they have a history of bad safety practices, that Patient Zero had no contact with the wet market, all of that is circumstantial evidence to be sure. But in intelligence questions, we rarely get direct or conclusive evidence."

### **BRITISH INTELLIGENCE**

British military and intelligence expert Col. (ret.) Richard Kemp said he had been told by an unnamed insider that there was a "very high probability" that SARS-CoV-2 was released unintentionally from a Wuhan lab and was a "man-made variation."

Kemp added: "...The virus came from an animal that had been involved in testing in the WIV (Wuhan Institute of Virology), and had ended up in the wet market. It was believed then and now that an unscrupulous member of staff sold it for personal profit without considering it may be infected. That is how it got out... a postulation known to be true but [that] cannot be backed up by absolute evidence."

## CORONAVIRUS PANDEMIC

# **SCARY NUMBERS!**

For a member of the public who wants to follow the course of the pandemic, two key numbers are provided from government sources: Number of new deaths X (persons died of COVID-19) per day, and number of new cases Y (persons tested positive for COVID-19) per day. These are also the numbers on which crucial nationwide decisions are made. Here is the thing: According to some knowledgeable analysts outside of the doctors who run the pandemic show, these numbers that are in use are greatly flawed to the extent of being almost useless.

X includes anyone who ever tested positive (was once Y) for COVID-19 who, at any time later, died for any cause (e.g. old age.) There is also going on screwups about the actual date of death and the date on which death is counted. These faults distort the picture in favor of the fearmongers.

Y is a barrel of laughs. There are many anecdotes that people who never took the test were counted in Y. Some labs reported 100% of people swabbed as COVID-19 positive. But seriously, the swab test (RT-PCR test) itself is largely useless. It does not detect the COVID-19 virus. There are many reasons you could test positive. In fact (this is no joke!), swabs from a goat, a sheep, a bird and a papaya tested positive for COVID-19. Furthermore, when the number of testings ramps up on a daily basis, there is no statistician to ascertain that the corresponding Y reported is independent of the ramp up. This distorts the picture in favor of the fearmongers.

# CORONAVIRUS PANDEMIC: VACCINES, VIRUS **VACCINES ↔ LAB ORIGIN**

More reports are out, favoring the lab origin of the novel coronavirus. Earlier, I reported the Norwegian-British team saying the development of a vaccine requires a knowledge whether the virus is of natural (zoonotic) origin or not. Dr. Anthony Fauci's aggressive campaign of fearmongering always seemed to me to be driven by something more than just the desire to remain in limelight. Many objective observers have noted that this virus is exceptionally lethal. But Fauci's imagery – he uses imagery effectively – of “mother of all pandemics”, “perfect storm”, “my worst nightmare”, “never seen anything like this” ... seems to add up to some consciousness of guilt.

Right off the bat, he rejected lab origin – stating that the virus has all the earmarks of zoonotic origin. This position is inconsistent with above imagery. Other scientists argued against lab origin, but left an “out”.

As the chorus of lab origin rose and experts explained that a vaccine design that did not take lab origin into account may fail, Fauci started to guide down public's expectation from the vaccine he had touted so much.

Fauci has now started to oppose the concept of herd immunity. This is a mainstay of epidemiology of respiratory diseases. So, if you abandon it, there must be specific reasons rooted in the virus itself. If the virus is of normal zoonotic origin, why no herd immunity?

All these stances have been projected with extreme authority. Add to this the conduct of Dr. Francis Collins, Fauci's boss. Collins blanketly shields Fauci from all scrutiny. He endorses Fauci as he endorses God.

CORONAVIRUS PANDEMIC

# FEARMONGERING

**Fearmongering** or **scaremongering** is the spreading of frightening and exaggerated rumors of an impending danger to purposely arouse **fear** in order to manipulate the public.

One iconic example of fearmongering in American politics is the *Daisy* television commercial, an oft-referenced advertisement used during Lyndon B. Johnson's 1964 presidential run. It begins with a little girl standing in a meadow with chirping birds, picking the petals of a daisy while counting each petal slowly. When she reaches "9", an ominous-sounding male voice is then heard counting down a missile launch, and as the girl's eyes turn toward something she sees in the sky, the camera zooms in until her pupil fills the screen, blacking it out. When the countdown reaches zero, the blackness is replaced by the flash and mushroom cloud of a nuclear explosion.

As the firestorm rages, a voice-over from president Johnson states, "These are the stakes! To make a world in which all of God's children can live, or to go into the dark. We must either love each other, or we must die". Another voice-over then says, "Vote for President Johnson on November 3. The stakes are too high for you to stay home". - Wikipedia

# CORONAVIRUS PANDEMIC: BIOWEAPONS

## **BIOWEAPONS-SUPPORTING SCIENTISTS PUT ON THE SPOT**

In April the U.S. shut down a scientific project to weaponize coronavirus to virulently attack humans. This project was under a grant given to EcoHealth Alliance, but the actual research was being conducted at the Wuhan Institute of Virology (WIV) in China. In May, 77 Nobel Laureates wrote an open letter in righteous protest to U.S. officials, demanding the program be reinstated. There was another open letter demanding the same from 31 scientific societies.

In July, the U.S. wrote to EcoHealth, asking them to answer the following questions (as reported in *Science*, August 19, 2020):

- The EcoHealth Alliance must provide a sample of the pandemic coronavirus that WIV used to determine its genetic sequence.
- The group must arrange for an outside inspection of WIV and its records “with specific attention to addressing the question of whether WIV staff had SARS-CoV-2 in their possession prior to December 2019.”
- The nonprofit must explain purported restrictions at WIV including “diminished cell-phone traffic in October 2019, and the evidence that there may have been roadblocks surrounding the facility from October 14-19, 2019.”
- The nonprofit must “provide the NIH with WIV’s responses to the 2018 Department of State cables regarding safety concerns.”

These pointed questions directly probe non-zoonotic origin (“Lab origin”) of the COVID-19 virus.

## CORONAVIRUS PANDEMIC: LAB ORIGIN OF THE VIRUS NATURAL ORIGIN IS HIGHLY IMPROBABLE

"You have a basic bat coronavirus and you have two things that have been added to it. The spike protein is closest to an animal called the pangolin. We do know that somehow this bat virus was infected by at least two other animals and then went into a human host. And for that virus to be the way it is, it had to happen simultaneously. ...

"Someone will have to come up with a scenario. It sounds almost like a joke. A horseshoe bat, a pangolin and some other creature met in a bar in Wuhan and somehow simultaneously infected them.

"I haven't seen any scenario of how that happened or where that happened. But we know that had to happen. It happened somewhere. It either happened in nature or it happened in the Wuhan Institute of Virology or it happened at the CDC lab in Wuhan."

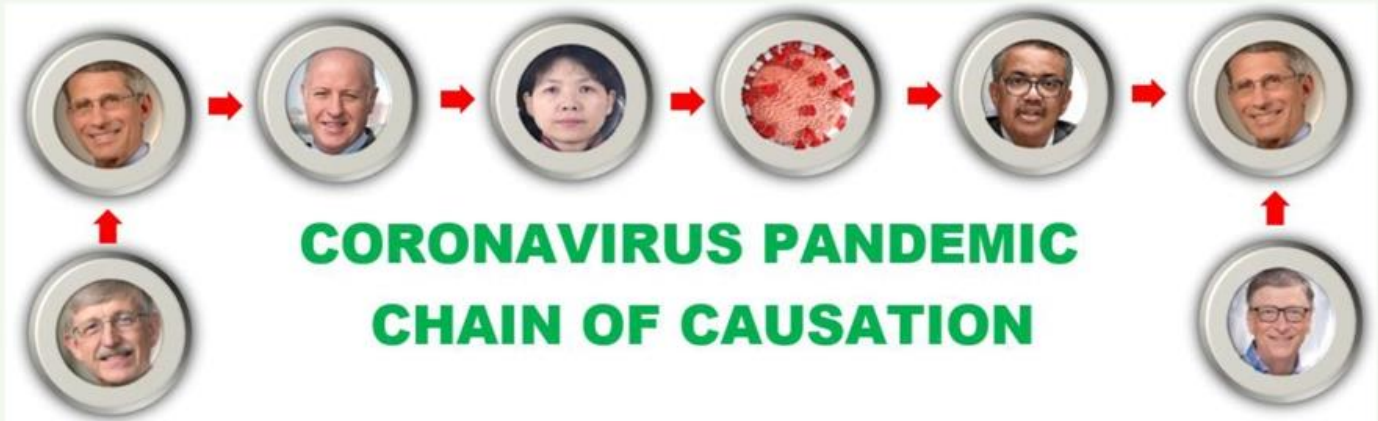

- Andrew Kimbrell, *Corporate Crime Reporter*

# PANDEMIC PICTORIAL

*From bottom left:* Collins makes sure that what Fauci wants, Fauci gets. Fauci supports Daszak to do some cool jungle adventure hunting coronavirus bats. Daszak supports Shi to weaponize coronavirus in her lab in Wuhan, China. Shi makes from bat coronavirus a “passaged” virus that attacks humans most effectively. This virus somehow gets out of Shi’s lab and spreads among humans like wildfire. Tedros declares a pandemic. Fauci becomes US pandemic czar and shuts down the economy. He scoffs at the idea the virus is anything but natural. He then patronizes vaccine designs based on that natural origin. Gates backs Fauci’s virus programs. Experts say vaccine design depends on origin.

Failed Dr. Anthony Fauci has become irrelevant as the pandemic initiative has been taken away from him, and able people are healing the nation. So he is trying to horn in on the credit by suddenly turning into the embodiment of hope and compassion.

"There is good news in the public health area. We see that when we have states, and cities and counties and areas that do abide by the public health mandates that I'm speaking about now with you today, they do turn around the surges and in fact blunt any surges. That tells me that we can do it. We've proven that you can actually control the outbreak."

Fearmongering is the most attention-getting and least brain-taxing stance. Stated differently, a scientist with some substance in his cranium will invariably see fearmongering an irrelevant course of action – even if there are grounds for fear. A long time ago there was a panel discussion on nuclear threat, and Carl Sagan was really laying on fear thick – just like the doctors above. Then Kissinger said: *To engage in an orgy of demonstrating how terrible the casualties of a nuclear war are, and translating it into pictures from statistics that have been known for three decades, and then to have Mr. Sagan say it's even worse than this... I would say: what are we to do about this? Are we supposed to make policy by scaring ourselves to death, or is somebody going to make some proposals about where we are supposed to go? And if people don't make them, then I do not believe we are making any contribution.*

## **DR. SCOTT ATLAS BESIEGED**

Seventy-eight medical professionals from Stanford medical faculty have published on 9 September an Open Letter blasting "the falsehoods and misrepresentations of science fostered by Dr. Scott Atlas." Their points are nothing new: the same old Fauci pedanticism, without any sense that the practical world is in a death spiral. This is the telling portion:

- The pandemic will be controlled when a large proportion of a population has developed immunity (referred to as herd immunity) and that the safest path to herd immunity is through deployment of rigorously evaluated, effective vaccines that have been approved by regulatory agencies.

These "expert" dweebs want to continue indefinite lockdown to keep children out of schools and adults out of jobs and stricken out of medical care until Godot arrives. Suicides? Mental health? Old folks dying alone? Starvation deaths? Men you got to stop worrying about such trivia. You got to start listening to the infectious disease experts, and no one else.

Much of the world is done with the pandemic and is moving on. But not America. She is cursed with an overabundance of expert morons, and a very small supply of men of true mettle. Me, I would put this Open Letter in the Circular File.

### **NOBEL LAUREATES WEIGH IN**

Eighty-one American science Nobel Laureates issued an Open Letter endorsing Joe Biden for President:

*"At no time in our nation's history has there been a greater need for our leaders to appreciate the value of science in formulating public policy. During his long record of public service, Joe Biden has consistently demonstrated his willingness to listen to experts, his understanding of the value of international collaboration in research, and his respect for the contribution that immigrants make to the intellectual life of our country."*

My thoughts: Endorse away. But if science is what you are really worried about, why leapfrog to Biden candidacy while the greatest bastardization of science in human history is going on right now, right before our eyes, by entire collusive scientific establishments? Why not engage in preventing this great death and destruction resulted from idiotic or intentional misinterpretations of science, of data, and of evidence? Aren't you thereby actually engaging in a deadly cover up of the issue of origin of the virus? Aren't you becoming a party to withholding life-saving medication from the hapless dying? Can you not understand that epidemiology is not altogether pedantic science entirely in your purview, that other parties safeguarding other vital interests must weigh in? A president has to take all this into account in deciding how to proceed - wisely.

## **BILL GATES GOES TOO FAR**

Bill Gates is a big-hearted global philanthropist. He is a smart man who has shown us what he can do with talent and toil. I do not discuss him lightly.

His recent powerful attack: "The administration's now hired this Stanford guy who has no background at all just because he agrees with their crackpot theories."

What is actually unfolding on the ground around Dr. Scott Atlas? There is nothing crackpot about prudent risk-taking within four corners of applied science to carefully reopen the society, the economy, the cultural and spiritual life of America. The alternative: Face a version of *The Day After*. Nothing crackpot about our wanting to hear once again the voice of "the children in apple-tree." The alternative: Dystopia. Gates is venting for his discredited friend Anthony Fauci. Gates may regret this smeary association as he regretted that with a convicted child rapist. In the latter case, he said he did not know. This time, *he knows*.

Gates also said that the US outbreak "has been a mismanaged situation every step of the way. It's shocking. It's unbelievable—the fact that we would be among the worst in the world."

He's right. His good buddy Fauci the Fearmonger screwed everything up bad from the get go. The White House is picking up after him, and absorbing the blame due him. Dr. Atlas is helping. We'll be all right.

## CORONAVIRUS PANDEMIC: LAB ORIGIN OF VIRUS **IVORY-TOWER JIGGERY-POKERY**

Andersen Bergstrom Robertson Lipkin Rasmussen

These are a few of the academics strenuously defending the pure zoonotic origin of COVID-19 virus to the public, and rubbing with force of authority any differing ideas. I am no biologist, but when I read both sides with open mind, it is clear even to me that the academic set is trying to bamboozle you. Just one example: Col. Lawrence Sellin (Ret.), Ph.D., a scientific expert on the subject, explains an argument for lab origin:

... the COVID-19 virus contains a furin polybasic cleavage site with an amino acid sequence of proline-arginine-arginine-alanine or PRRA that facilitates membrane fusion between the virus and the human cell and widely known for its ability to enhance pathogenicity and transmissibility. Such a sequence is not found in any other related bat coronavirus and, so far, there is no natural evolutionary pathway identified that could explain the appearance of that PRRA segment. *(Highlighting mine.)*

The academics dismiss the point with sophistry:

The report claims this feature is found on no other coronavirus and therefore must be engineered. But this statement contradicts findings: similar cleavage sites are found on bat coronaviruses in wild populations. *(Highlighting mine.)*

Notice the weasel word "similar". Has the PRRA segment been found in related bat coronaviruses or not? If not, this is a ruse to suppress the search for truth. Bibhas De 09/20/2020

### **Fauci's infectious disease agency broke federal spending law and rules, audits show**

By Daniel Payne and John Solomon (justthenews.com)

Updated: July 22, 2020 - 11:26pm

As scrutiny of Fauci's role in managing the pandemic grows, the nation's infectious disease specialist has defended himself by citing his long record in government. But that record includes several ethics and patient safety controversies on his watch as well as numerous citations for violating contract "time" and "amount" rules and the Anti-Deficiency Act, a federal law.

- A 2005 finding that AIDS drug research projects on foster children in New York, Illinois and elsewhere failed to provide promised patient protections, sometimes in violation of legal requirements.
- A 2004 internal NIH review that concluded Fauci's AIDS research division was a "troubled organization" where managers were creating a hostile atmosphere with "sexually explicit and colorful language" and "seemingly being unaware of the need for appropriate behavior, decorum and enforcement of good management practices and rules of supervision."
- A pregnant Tennessee woman who died in 2003 after she enrolled in NIH-funded research in hopes of saving her soon-to-be-born son from getting AIDS. A review found that doctors continued to administer an experimental drug regimen despite signs of liver failure.
- At least 10 children in a pediatric AIDS drug study died in what an investigation concluded was a death toll "significantly higher" than expected and unexplained. A 1992 Department of Health and Human Services inspector general investigation that concluded NIAID failed to police two conflicts of interest in a vaccine experiment.

## CORONAVIRUS PANDEMIC: DR. ANTHONY FAUCI

### **A MONSTER IN MONKEY SUIT?**

Fauci is not the legendary scientist the media holds him out to be. There are countless medical researchers with comparable cvs. He is not the leader the media holds him out to be. His directorship of NIAID is marked by a trail of angry protests against him (burning him in effigy, writing scathing books on him), and many oversight failures evinced by US audits. His fruitless vaccine search wasted tens of billions of taxpayer dollars. Still, he is the highest paid US employee, at an annual salary of ~\$425,000 +. Dr. Francis Collins is the benefactor.

Dr. Fauci's pandemic leadership is marked by chronic incompetence from the get-go, and a dog-in-the-manger stance that kept out beneficial expertise. Right off the bat, he should have done four obvious things: protect the vulnerable, develop a nationwide strategy, facilitate use of HCQ, and develop vaccines. He did nothing about the first two, and played favorites with the last two. Great deaths followed. He neatly blamed the White House, and glammed himself up.

As to reopening the nation, he became an obstructionist fearmonger and a safety Nazi ever since he was sidelined. He called for unrealistic and unachievable goals. Note that there's a trail of repeated clinical safety violations at Fauci's own shop, leading to deaths. One time his doctors kept pushing experimental drug into a woman even as her liver was failing, and killed her. Another trial involved unexplained death of kids. But Fauci is neither accountable nor answerable. He also ramrodded through his needless bioweapons program over intense public-safety objections from colleagues, just so he could get his jollies. When it came to developing vaccine candidates for the pandemic, he became a bold risk-taker with his favored, untested mRNA vaccine. So, he uses the safety card or the science card as it suits his evildoing. What a sicko!

Step 2: Gather Information for Weighing Your Options.

Did nothing of the kind. Saw the Ferguson model and plunged headlong into it.

Step 3: Consider the Consequences.

Step 4: Make Your Decision.

Never formulated any operational decisions (e.g. a nationwide strategy.)

Step 5: Evaluate Your Decision.

Fauci, an 80-year old pedant, considers himself infallible and unreviewable. 09/30/2020

COMBATting THE PANDEMIC: WHAT IS THE KEY?

## EXPERTISE IS NOT THE KEY

"We've got to get those numbers down. If we don't get them down, we're going to have a really bad situation in the fall ... as you get indoors and you get the complications of influenza season." - Dr. Anthony Fauci

This is the consummate idiot's view: Stop the virus! It is like commanding flood water not to rise. Fauci is constantly moping about and asking every few minutes: "How high's the water, mama?"

## INTELLIGENCE IS

"My advice is exactly this. It's a three-pronged strategy. Number one: aggressive protection of high-risk individuals and the vulnerable (typically the elderly and those with co-morbidities). Number two: allocate resources so that we prevent hospital overcrowding, so that people can be treated for this virus and get the other serious medical care that is needed. Number three: open schools, society and businesses because keeping them closed is enormously harmful – in fact it kills people."

- Dr. Scott Atlas

This is the intelligent leader's view: Deal with *the entirety* of the problem. Be compassionate. Value people. Don't chase the problem's tail but get ahead of it.

## **FAUCI CLAIMS HE SAVED MILLIONS OF LIVES; GLORIES ON BEING A CHICK MAGNET; Explains he is a symbol**

Dr. Anthony Fauci's image repair campaign proceeds apace. Here, for example, an interview dated 17 June 2020 done at HHS at public expense. In this seemingly free-wheeling interview, he actually defends himself against his critics, and holds himself out to be the end all. A little sampling of the ramblings of this megalomaniac:

**"Michael Caputo:** And I noticed that you're always frank. You stick with the science. And that confuses some people.

**Anthony Fauci:** ...This was unprecedented, you know, and when you give advice about what should you be doing, should you be out there, should you be shutting down earlier versus later? I mean, people get confused. And they say, "Wow, you know, we shut down and we caused a great disruption in society. We caused great economic pain, loss of jobs." But if you look at the data, now that papers have come out literally two days ago, the fact that we shut down when we did and the rest of the world did, has saved hundreds of millions of infections and millions of lives. And yet, there are those who say, "You shut down, you did destructive things by disrupting the economy." And others say, "Well, if you save so many infections by shutting down, why didn't you shut down two weeks earlier? You could have saved many more lives." ...

**MC:** I mean, I can tell you that the older, you know -- like, my mother thinks that you hung the moon, you know, and, you know my wife -- I mean, I don't know what it is. You just got this magnetism.

**AF:** Well, I think it's more of a symbol of what the American people want. They want someone who speaks honestly to them. They want someone who gives them the truth based on data. And they feel the need for that, so I become a symbol. And all of that other stuff that, you know, sex symbol, Brad Pitt stuff, it's kind of interesting."
